VISTA

OVERBED DIFFUSER

DESIGNED FOR

Healthcare Facilities – Assisted Living, Long Term and Hospital

VISTA OVERBED

The Vista Overbed Diffuser has been developed to allow Lighting OEMs the ability to produce a contemporary wedge shaped Overbed Patient Luminaire utilizing a traditional full sized 3 lamp fluorescent strip housing.

Applications Include

- Hospitals
- Long-term care facilities
- Assisted living facilities
- Nursing homes

Vista Overbed Features

- Compound curved contemporary styled wedge shaped end caps
- Choice of molded-in or painted end cap colors
- Choice of metallic/wood appliques for front face of diffuser
- White Acrylic/DR extruded Profile diffuser

RLR Industries, Inc.

Since 1957, RLR Industries, Inc. has been manufacturing plastic lenses and diffusers for the lighting industry. In addition, the firm has performed custom forming and fabrication services for many diverse industries.

Over the years, our capabilities have expanded from our core capabilities of thermoforming and fabricating plastic sheet products to injection molding, CNC fabrication and flat sheet extrusion.

Our modern 100,000 square foot facility in Mableton, Georgia contains state of the art plastics processing equipment. Our commitment to manufacturing demands that we constantly research and implement the latest cost effective technologies in our manufacturing operation.

RLR maintains an in house tooling staff to produce our vacuum and pressure forming tooling, as well as all associated fabrication jigs and fixtures. We also maintain our injection molds in house. We have the ability to source high quality injection molds through a time-tested network of tooling suppliers.

RLR maintains a stock tooling list, as well as performing custom product development and production for lighting OEMs. All proprietary OEM work is held on a confidential basis for our customers.

We have stocking warehouses in strategic areas of the United States and maintains a just-in-time service on our stock items for our customers from our Mableton, GA facility. In addition, RLR maintains just-in-time stock for custom products on a contract basis for our customers.

The Mableton, Georgia facility is conveniently located 20 minutes from Atlanta's Hartsfield International Airport and is within 5 minutes from major interstate routes. We welcome our customers to visit us at your convenience to discuss your custom plastic requirements.

Privately held, the Lewis family, now in their second generation of serving the lighting industry, is dedicated to continue to serve your thermoforming, injection molding, and fabrication needs.
